

GREENCOAT® ...

Wax Free Fresh Produce Packaging

• Wax Alternative • Fruit • Vegetables • Boxes • Environment • Economic • Ice Pack • Patent • 

Challenge:

A box industry challenge was to provide a viable alternative to waxed boxes. Traditional paraffin waxed boxes are on the path to extinction due primarily to their inability to be recycled.

The future is clear – wax replacement packaging of fresh fruit and vegetables, as well as floral products, will become a necessity. Moist environments create challenging conditions for any wax replacement solution. Performance is critical, as is the price point.

Solution:

Interstate Container Cambridge did the improbable. They created GREENCOAT wax replacement boxes as a cost effective, sustainable, and 100% recyclable solution.

GREENCOAT is made with a proprietary in house process that makes it the strongest and most durable wax replacement box available.

Revolutionary GREENCOAT Wax-Alternative Boxes:

- 100% recyclable and repulpable
- Meets or exceeds most current wax box performance
- Easily setup with traditional hot melt glue
- Holds up in high humidity situations where non-waxed boxes won't
- USDA-approved
- Eliminates costly wax disposal fees for you and your customers
- Allows your pricing to stay flat and not tied to volatile wax market
- Less costly than cascaded boxes

Millions of these boxes are currently in use and proven to be successful in the toughest applications.

Interstate Container's immense success in GREENCOAT resulted in the first and only plant built to specialize in this revolutionary wax-replacement technology in Columbia, South Carolina.

Let Interstate Container work with your team to solve your customer field pack and moist environment corrugated box needs.

Proven Solution in:

- Cucumbers
- Peppers
- Eggplant
- Squash
- Zucchini
- Tomato
- Peach
- Cabbage
- Bulk Bins
